The accuracy of breastfeeding reports is dependent on the accuracy of the information that is put into the system. All reports discussed reflect WIC active infants and children, their birth and certification dates, and the breastfeeding information recorded on the Infant/Child Health Visit screen (PA09) screen in Cornerstone. WIC active infants are actively participating in the program and active the day the report is run. To ensure that the data generated on the breastfeeding reports is as accurate as possible, once a breastfed baby is supplemented, or is no longer being breastfed, staff must update the Infant/Child Health Visit screen (PA09). Infants/children in a terminated status when the report is run are not reflected.

Local agencies are encouraged to review reports with staff and provide guidance on how to ask breastfeeding questions and consistently enter information on the PA09 screen. Refer to Illinois WIC Program, Nutrition Practice Guideline Breastfeeding; August 2009; Revised April 2010.

*Quarterly Reports are available at: [www.dhs.state.il.us](http://www.dhs.state.il.us) (For Providers/Provider Information by Division/Community Health and Prevention Provider Information/Reports/Quarterly Provider Reports).
WIC Breastfeeding Initiation Report (HSPRO117)

- Allows user to compare rates of breastfeeding to the total number of infants born.
- Allows users to monitor breastfeeding initiation and duration rates.
- Lists breastfeeding initiation rate for the current month and the cumulative total initiation rates since the beginning of the fiscal year (July 1).
- Identifies the 6 and 12 month duration rates for the current month and the cumulative 6 and 12 month duration rates since the beginning of the fiscal year (July 1).
- Cumulative total counts WIC active infants with birth dates since July 1.
- Based on active WIC infants, their birth and certification dates and the breastfeeding information recorded on the Infant/Child Health Visit screen (PA09).
- Automatically prints on the second day of the month, or can be printed on demand from the On-Request Report Selection screen (RP01)
- Use to evaluate breastfeeding program activities, initiation and duration and new initiatives.

WIC Breastfeeding Reasons Ceased Report (HSPR0118)

- Allows user to monitor reasons breastfeeding ceases by age and target specific education.
- Use in conjunction with WIC Exclusivity Report to target reasons exclusivity drops.
- Identifies the number of active WIC infants who stopped breastfeeding by age in weeks and by reason ceased.
- Calculates the number and percent of infants who stopped breastfeeding at 1, 2, 3, 4, 5, 6, 7, 8, 9-16, 17-23, 24-28, 29-49, 50-54 week intervals.
- Information is provided for the current month and cumulatively since the beginning of the fiscal year (July 1).
- Cumulative total counts WIC active infants with birth dates since July 1.
- Based on active WIC infants, their birth and certification dates and the breastfeeding information recorded on the Infant/Child Health Visit screen (PA09).
- Automatically prints on the second day of the month, or can be printed on demand from the On-Request Report Selection screen (RP01)
WIC Breastfeeding Follow up Report (HSRR0119)

- Allows users to follow-up on mothers and breastfed infants.
- Displays the participant name and ID, group head for the infant, phone number, and birth and certification date.
- If information has been entered on the Breast Pump screen (PA29), the applicable data (all pump types received, and the pump received and return dates) will also be displayed.
- Information is provided for all active WIC infants and children who are currently breastfeeding as of the date entered.
- Printed on demand from the On-Request Report Selection screen (RP01)
- Can be run for all breastfed infants/children, or breastfed infants/children by date of birth (date range) or for those with pumps only.
- The report can be sorted by date pump received (the default), participant name, participant ID, and date of birth.

Breastfeeding Quality Assurance Report (HSRO120)

- Provides data needed to complete breastfeeding food package quality assurance reviews.
- Allows users to monitor breastfeeding dyad food package issuance, follow-up and participant education on breastfeeding.
- Displays all current breastfed infants to 1 year of age, listed youngest first by: name, ID, category of mother; name, ID, DOB of child; certification date of mom and baby; date of most recent WDBE; and name of CHP completing WBDE; food package issued for mom and baby for last current and next month.
- Based on active WIC infants, their birth and certification dates and the breastfeeding information recorded on the Infant/Child Health Visit screen (PA09).
- Includes all babies “currently BF” yes and most recent WBDE assessment.
- Automatically prints on the second day of the month, or can be printed on demand from the On-Request Report Selection screen (RP01)
- Use to evaluate breastfeeding program activities, initiation and duration and for the Integrated Plan for Healthy MCH Outcomes
- Use to ensure that CHP staff are competent in basic breastfeeding knowledge/counseling and follow the WIC breastfeeding philosophy.
- **WIC Breastfeeding Tracking Summary Report (HSPRO717)**
  - Local Cornerstone
  - Allows users to view breastfeeding rates and reasons ceased for infants 0-<2 months of age that are active the date the report is run.
  - One page summary displays breastfeeding rates for currently, exclusively and partially breastfed infants 0-<2 months of age based on date run.
  - Includes all active WIC infants who are currently breastfeeding <2 months of age as of the date entered.
  - Displays “mother stated reason ceased” summary for all infants who ceased breastfeeding for the previous month.
  - Based on active WIC infants, their birth and certification dates and the breastfeeding information recorded on the Infant/Child Health Visit screen (PA09).
  - Printed on demand from the On-Request Report Selection screen (RP01).

- **WIC Breastfeeding Tracking Detail Report (HSPRO718)**
  - Local Cornerstone
  - Allows users to follow-up on mothers and breastfed infants 0-<2 months of age.
  - Displays the participant (infant) name, ID, phone number, address, and birth and certification date.
  - Includes all active WIC infants 0-<2 months of age who are currently breastfeeding as of the date the report is run.
  - Automatically prints on the second day of the month, or can be printed on demand from the On-Request Report Selection screen (RP01).
Count & Percent of WIC Breastfed Infants (T140)  Springfield Cornerstone

- Allows users to monitor breastfeeding initiation and duration rates.
- **Initiation** - Provides count and percent of infants ever breastfed, born to WIC mothers and active in WIC during the report period.
- **Duration** - Provides count and percent of breastfeeding infants at 6 months using infants ever breastfed, born to WIC mothers and active on the WIC program who turned one year old during the report period.
- Data matches WIC BF – Initiation and 6 Mos Duration found on Quarterly Performance Report.
- Use to evaluate breastfeeding program activities, initiation and duration and for the Integrated Plan for Healthy MCH Outcomes
- Report available on the DHS website in the Quarterly Provider Reports http://www.dhs.state.il.us/page.aspx?item=45806 dhs.state.il.us/for providers/by division/community health and prevention provider information/quarterly reports/breastfeeding promotion/

WIC Breastfeeding Exclusivity Report

Infants Turning 7 Months Old (T287)  Springfield Cornerstone

- Allows users to monitor breastfeeding exclusivity and supplementation rates.
- Determines rates of currently breastfeeding based on date ‘BF ceased’ to calculate weeks 1, 2, 4, 12
- Determines rates of exclusivity based “age first formula” field on Infant Child Health Visit Screen (PA09) at 1, 2, 4, 12 weeks.
- Report includes all active WIC infants who have reached their 6 month birthday
- Use to evaluate breastfeeding program activities and rates of exclusivity for the Integrated Plan for Healthy Outcomes
- Report available on the DHS website in the Quarterly Provider Reports http://www.dhs.state.il.us/page.aspx?item=45806 dhs.state.il.us/for providers/by division/community health and prevention provider information/quarterly reports/breastfeeding promotion/
WIC Peer Counselor Summary Report (T228)

- Allows users to monitor breastfeeding initiation and one month duration rates for those women with peer counselors contacts compared to those without peer counselor contacts.
- Determines rates of breastfeeding based on “currently breastfeeding” field on Infant/Child Health Visit Screen (PA09).
- Report counts only women (P, B, N) who had live births in the reporting quarter. Mom and baby must be grouped via birth screen.
- Women who continued past one month definition: active infant that was breastfed $\geq$ 29 days.
- Infants eligible for one month duration pool – those infants born to women who could have received a PC contact 255 days before delivery or 57 days after delivery.
- Report includes all women with live births in report period; all women with peer counselor contacts and those women without peer counselor contacts based on rates of initiation and continued past one month.
- Use to assist in completing the objective for increasing peer counselor services (contacts) for the Integrated Plan for Healthy Outcomes.
- Report emailed quarterly to Peer Counselor Program Supervisor.

WIC Infants Turning 12 Months during Reporting Period

- Allows users to monitor breastfeeding 6 month and 12 month duration for those women with peer counselor contacts compared to infants without peer counselor contacts.
- Determines rates of breastfeeding based on “currently breastfeeding” field on Infant/Child Health Visit Screen (PA09).
- Report counts only women (P, B, N) who had active live births turning 1 year old in the reporting quarter. Mom and baby must be grouped via birth screen.
- Report includes all women with live births in report period; all women with peer counselor contacts and those women without peer counselor contacts based on rates of initiation, 6 month and 12 month duration.
- Infants eligible for the 6 month pool include those infants turning 12 months old in the report period born to women who received the PC service code 255 days before delivery and any point during the first 12 months after delivery.
- Of those infants turning 12 months of age, report pulls data on infants at 6 and 12 month birth days.
- Use to assist in determining impact of Peer Counselor contacts on 6 and 12 month duration.
- Report emailed to quarterly to Peer Counselor Program Supervisor.
CDC Pediatric Nutrition Surveillance Reports
- The Illinois WIC Program participates in the *CDC Pediatric Nutrition Surveillance System* by providing data entered for WIC active infants and children in Cornerstone on Birth and Infant/Child Health Visit screens.
- Reports the number and percent of infants aged 6 to 8 months* who were ever breastfed and the duration up to six months (at least 1 day, 1 week, 1 month, 2 months, etc to 6 months).
- The same information is provided for infants in the age group of 9 to 11 months and children 12-14, 15-17, 18-20 and 21-23 months of age.
- The information is reported by age of child at clinic visit.
- Use to evaluate breastfeeding program activities, initiation and duration
- This report is provided on a semi-annual and annual basis (January - June, July - December and January through December).
- For example, Calendar year 2010 report reflects infants born between 5/1/09 - 6/30/10.
- Available by contacting Regional Nutritionist Consultant.
